Work History

2021-04 - 2023-11

Frontend Developer

Mirumee Software, Wrocław

I used **React**, **Typescript**, **GraphQL**, **SCSS**, **Styled Components**, **React Testing Library** and **Jest** to create an **USG preview web application** for hospitals, mainly in USA. I was working for a client that created a very small USG device which **allows to use them in Africa** and any other coutries that medical services are not possible because of a huge size of the traditional USG device. This was a cooperatioon of **USA and Poland team**.

I also worked on an **e-commerce** web application selling expensive watches with **NextJS** and **Saleor**. Saleor is an e-comm backend and dashboard created by Mirumee. Here we had people from **Poland, France and Switzerland**.

2018-03 - 2021-03

Frontend Developer

FINGO Software House, Wrocław

In FINGO I used **React**, **Redux**, **SCSS**, **AG Grid**, **REST**, **Enzyme** and **Jest** to develop a web application for **tabular data** of reports and to manage a **lifecycle statuses** of those reports for a **polish banks**. Just polish team here.

2017-07 - 2018-02

Frontend Developer

Ringo Solutions, Wrocław

This was my first job as a frontend developer where I started my journey with **Javascript** and **CSS**. I was just doing simple websites without any framework and fixing bugs. However I had a chance to be on a meetings with an **international clients**.
